Number of reads of / writes to file '/linux-6.13-rc6.tar.gz'

Image width/height in pixels $w = 64$

Number of image pixels $p = w \cdot w = 64 \cdot 64 = 4096$

Filesize in bytes $s = 245825385$

$\Rightarrow$ Each pixel corresponds to a chunk of $b = 60015$ bytes

Pixel at position (i, j) maps to byte region

from inclusive $b(iw + j)$

to exclusive $b(iw + j + 1)$
